

**CAR POOLING SERVICES**

# LOG IN PAGE

*The log in page will ask the user for their credentials like name, E-mail, number etc.*

# HOW THE WEBSITE WORKS

*The user needs to add their location which will be tracked by the API*

*The API will map the road till Sushant University and highlight all the students who are near or on the same track for carpooling*

*The person with the vehicle will have to specify the number of seats vacant for car-pooling and needs to update that information regularly.*

*The students can co-ordinate with each other via phone number and Email-ID.*
